EXECUTIVE SUMMARY

Technical Product Manager and full-stack systems builder (B.Eng. Electrical & Electronic Engineering) with 5+ years of experience owning 0-to-1 product strategy, system architecture, and commercial delivery across multi-sided marketplaces, AI-governed workflows, and payment infrastructure. Proven track record shipping production software across Next.js, TypeScript, Node.js, MongoDB, Redis, and BullMQ. Architected and launched a 3-sided urban retail marketplace achieving a **30% customer repeat purchase rate** and a **24.5% platform take-rate**, alongside an AI decision-governance product that decouples LLM reasoning from consequential execution authority. Mentored 900+ global product and UX practitioners at Springboard (US).

CORE TECHNICAL & PRODUCT COMPETENCIES

Domain	Capabilities, Frameworks & Technical Stack
Product Leadership & GTM	0-to-1 Product Strategy, PRDs & System Specifications, Marketplace Unit Economics, Take-Rate & Pricing Optimization, B2B/B2C Onboarding Loops, Learning Systems Product Management, Curriculum Architecture & Instructional Design
AI Governance & FinTech	Human-in-the-Loop AI Authorization Boundaries, Agentic Workflow Logic, Voice UX State Machines, Double-Entry Ledger Architecture, Payment State Machines, Settlement & Invoicing Flows
Engineering & Infrastructure	TypeScript, React, Next.js, React Native (Expo), Node.js, Express, MongoDB, Redis, BullMQ, Firebase, REST APIs, WebSockets, Cloudflare R2, Docker, GitHub Actions CI/CD, Vercel, Render
Analytics & Experimentation	Google Analytics 4 (GA4), Google Tag Manager (GTM), Full-Funnel Telemetry, Cohort Retention Analysis, CAC/LTV Modeling, Design Systems, Usability & Prototype Validation

PROFESSIONAL EXPERIENCE

Co-Founder & Chief Product Officer — Shoppergetit (Pendulum HQ)

Abuja, Nigeria | Apr 2024 – Present

- Owned end-to-end product strategy, system architecture, and technical delivery for a live 3-sided e-commerce marketplace (Shopper, SME Vendor, and Admin operations), translating business milestones into shipped production releases.
- Engineered hybrid monetization mechanics combining B2B vendor subscriptions with transaction commissions, driving **102 completed beta orders**, a **24.5% average platform take-rate**, and a **30% repeat purchase rate** across early cohorts.
- Resolved SME seller onboarding resistance by designing automated product ingestion pipelines, procurement-agent workflows, customizable storefront templates, and PWA push-notification loops that minimized merchant operational friction.
- Partnered directly with engineering on architecture decisions, asynchronous job queues (Redis/BullMQ), real-time order state tracking (WebSockets), and CI/CD staging/production deployments across Vercel, Render, and Cloudflare R2.
- Instrumented granular funnel telemetry (GA4/GTM) and led a high-velocity 72-hour acquisition experiment that generated 40% of initial beta transaction volume while establishing baseline CAC and checkout conversion benchmarks.

> **Tech Stack & Tooling:** Next.js, React, TypeScript, Node.js, MongoDB, Redis, BullMQ, WebSockets, Paystack API, Cloudflare R2, GA4, GTM

Product Architect & Lead Builder — Williams Governance & Pendulum HQ

Abuja, Nigeria | Feb 2022 – Present

- **Williams Governance (Shipped Oct 2026 — governance.pendulumhq.com):** Architected and launched a commercial AI decision-governance product designed to separate AI reasoning from consequential execution authority—enforcing explicit assumption tracking, risk exposure bounds, and human-in-the-loop sign-off for institutional capital and operational decisions.
- Executed live institutional pilot evaluations using the Williams Governance framework, delivering structured hold/proceed determinations backed by audit-ready evidence gates and commercial viability scoring (CVS).
- **Pendulum AirPay & Identity:** Authored technical specifications and system boundaries for a closed-loop financial identity and payment infrastructure incorporating immutable double-entry ledgers, payment state machines, authorization rules, and settlement abstractions.
- **PAM AI (Voice Navigation Assistant):** Designed voice-first conversational UX and AI workflow logic for real-time urban traffic navigation and low-distraction driver routing.

- **Pendulum School of Innovation — LMS Product & Sole Curriculum Architect (pendulumsi.com):** Designed and shipped BOTH the digital learning platform (mentor dashboards, student progress telemetry, admin evaluation workflows) AND the entire underlying educational system. Independently conceived and authored 7 comprehensive curricula from first principles—spanning **Elementary, Advanced, and Professional UX** (/courses/UX), **Interaction Design (IxD), Product Management (PM V1), UX Research, and Product/UX Testing** (/courses/SC)—complete with points-based assessment rubrics, interval-locking progression logic, and capstone evaluation gates.

> **Tech Stack & Tooling:** React, Next.js, Node.js, Firebase, Payment Ledger State Machines, AI Agent Governance Protocols, Instructional Systems Design, Design Ops

UX & Product Strategy Mentor — Springboard

San Francisco, USA (Remote) | Dec 2020 – Present

- Delivered **900+ 1-on-1 mentorship sessions** for international UX and product learners across North America and Europe, coaching end-to-end product thinking, problem framing, research synthesis, and technical scoping.
- Strengthened candidate product ownership capabilities across PRD authorship, trade-off reasoning, system architecture storytelling, and executive stakeholder alignment.

Senior Product / UX Designer — HappilyEver.co

Remote | Aug 2022 – Apr 2023

- Led product experience design for a digital therapy and mental health platform, partnering with clinical and product stakeholders to define user requirements, onboarding flows, and retention priorities.
- Shipped accessibility-aware patient interfaces and reusable design system components that streamlined engineering handoff and improved end-to-end booking completion rates.

Product Designer — WeDance

Munich, Germany (Remote) | 2021 – 2022

- Designed core community discovery, event scheduling, and creator networking flows for a European social platform; established modular UI patterns that accelerated front-end feature delivery.

Product / UX Engineer — eHealth4Everyone

Abuja, Nigeria | 2020 – 2021

- Delivered UX architecture and front-end engineering execution for a Health Innovation Management System developed in collaboration with the **World Health Organization (WHO) Botswana**.
- Translated complex public-health program requirements into intuitive administrative workflows, improving data entry reliability and system usability across regional stakeholders.

SELECTED SHIPPED SYSTEMS & OPERATING FRAMEWORKS

- **Shoppergetit Marketplace (shoppergetit.com):** Live 0-to-1 urban retail marketplace with integrated vendor billing, logistics coordination, and automated catalogue ingestion.
- **Williams Governance (governance.pendulumhq.com) & Commercial Viability Compass (CVS):** Proprietary decision-governance runtime separating AI advisory output from operational execution authority; paired with GTMR (Go-To-Market Runtime) and IREE frameworks (williamspraise.com).
- **Pendulum School of Innovation LMS & 34-Document Curriculum System (pendulumsi.com):** Sole author of the complete multi-track learning architecture (Elementary, Advanced, Professional UX, IxD, PM V1, UX Research & Testing) paired with custom LMS progression-locking and mentor evaluation software.
- **Systems Research & Essays:** Published analytical treaties on institutional incentives and system design, including *The Systems of Schooling* and *Why America Became Rich* (williamspraise.com/portfolio).

EDUCATION & INTERNATIONAL ELIGIBILITY

Bachelor of Engineering (B.Eng.) in Electrical & Electronic Engineering 2016 – 2022

Federal University of Technology, Minna (FUT Minna), Nigeria — Second Class Honours (3.49 / 5.00 CGPA; Anabin H+ Recognized Institution for EU Blue Card & Swedish/Finnish Master's Equivalency; 100% English Medium of Instruction).
